

HYPERBARIC PRESSURE TESTING

Ref: (a) MILPERSMAN 1220-180

1. Purpose: The hyperbaric pressure test is designed to determine if the applicant can successfully adapt to increase atmospheric pressure without an adverse physiological reaction.
2. Conducting the test: This test is conducted in a hyperbaric recompression chamber
3. Waivers: Waivers for initial applicant screening maybe granted if a hyperbaric chamber facility is not accessible due to geographic isolation. This waiver is granted to the candidate by the screening activity
